Paraíba, Brazil

SUMMARY

Full Stack Software Engineer with 5 years of experience designing and delivering scalable web applications and SaaS platforms. Strong background in modern JavaScript ecosystems, with hands-on expertise in React, Next.js, Node.js, TypeScript, and cloud-based architectures. Experienced in building end-to-end solutions, from front-end interfaces to robust APIs, applying clean architecture, SOLID principles, and agile practices. Proven ability to translate business requirements into reliable systems, automate workflows, and improve operational efficiency. BSc in Computer Science from the Federal University of Paraíba (UFPB), with experience in mentoring, teaching programming, and contributing to academic and technical initiatives.

SKILLS

TypeScript, JavaScript, Node.js, React, Next.js, Angular, PostgreSQL, Prisma, REST APIs, AWS, Docker, Git

EXPERIENCE

Software Analyst

João Pessoa, Brazil (Hybrid)

Indra Minsait

03/2026 - Present

- Maintain and enhance judicial and government systems for the Court of Justice of Paraíba, supporting large-scale institutional operations in critical environments.
- Work across legacy and modern Java applications using JSF, PrimeFaces, CDI, Maven, WildFly, and relational databases to sustain and evolve enterprise systems.
- Develop and maintain Angular features for internal administrative systems, improving usability, maintainability, and operational efficiency.
- Investigate and resolve backend and infrastructure issues involving dependency injection, server configuration, authentication flows, and production runtime errors.
- Contribute to REST API integrations, database operations, system interoperability, and quality-focused development practices including code reviews, refactoring, and TDD.

Full Stack Software Engineer

Belo Horizonte, Brazil (Remote)

Laks Tecnologia LTDA

04/2024 - 03/2026

- Strengthened backend reliability by refactoring API route structures, redesigning Prisma entity relationships, and adding validation layers to reduce recurring operational issues tracked in Sentry.
- Built and maintained React-based administrative interfaces with dynamic forms, paginated listings, and reusable UI components, centralizing operational data and reducing manual support effort.
- Implemented end-to-end integration with the WhatsApp Evolution API, designing secure endpoints for outbound messaging, callbacks, and template management to automate communication flows.
- Partnered with product and operations stakeholders to deliver backend and frontend solutions aligned with business needs and scalable platform growth.
- Worked with TypeScript, Node.js, React, Prisma, PostgreSQL, REST APIs, Sentry, Scrum, and XP in daily product development.
